

FAQs

Does Laundry Jet work in a single story house?

Laundry Jet is a great solution for both single story and multilevel homes.

What if somebody puts a toy, cell phone, etc. in Laundry Jet?

Laundry Jet was specifically designed to transport laundry. Other items are too heavy to move through the system.

Can I install Laundry Jet in an existing home?

Laundry Jet is an ideal solution for both existing and new construction homes.

Where do I put the components for Laundry Jet?

Ports are placed in a convenient location like a bedroom, walk-in closet, or bathroom. The Jet Pack is installed in your laundry room.

How do I get 6" pipe in my 4" walls?

Laundry Jet uses 6.25" (159mm) SDR35 pipe and most standard walls are 4 inch. The most common installation puts Ports in the bedroom on the closet wall with a clear piece of pipe running up into the attic in the actual closet. For multiple floors or where there is no closet or attic space the pipe can be boxed in to a chase that hides it. On new construction developments the pipe paths can easily be designed into the build.
